CRYSTAL UNIVERSE
TRADING AS
AUSROX

Three mineral specimens are displayed against a black background. On the left is a cluster of green, translucent, prismatic crystals with sharp, well-defined faces, some showing internal inclusions. In the center is a mass of bright orange-red crystals, appearing more fused and less distinct than the green ones, with some darker, possibly black, material at its base. On the right is a fragment of a metallic mineral, exhibiting a bright golden-yellow color and a highly reflective, crystalline surface with visible cleavage planes.
