AXINITE PM,
mineralvvp@yandex.ru MOSCOW, RUSSIA

Three mineral specimens are displayed against a black background. The specimen on the left is a cluster of green, translucent, rhombohedral crystals, some showing internal cleavage, attached to a light-colored, translucent base. The specimen in the center is a fragment of a bright orange-red mineral with a crystalline texture. The specimen on the right is a fragment of a metallic mineral with a golden-yellow color and a highly reflective, crystalline surface.
