5. Thank-You! Photo gallery

Over the many years we publish this journal, we acquired many friends worldwide. We love our friends and highly appreciate our warm relationships. The all-round support we receive from them not only enables us to work but also stimulates us to do our best to improve the journal and make it ever more interesting.

Our meetings at mineral shows and conferences are priceless, but this year we were not able to visit the Tucson show, and both the Sainte Marie aux Mines and the Denver shows were cancelled. On these pages, we revive a section in which we were used to publish photos of friends of our journal. Herein we present photos of merely a relatively small number of our friends in token of our love for them.

We hope to see all our friends soon!
