ROCKS & MINERALS

*For Everyone Interested in
Minerals, Rocks & Fossils*

Amateurs as well as professional scientists delight in and pore over *Rocks & Minerals*, which has published articles on mineralogy, geology, and paleontology since 1926. Regular departments explore important discoveries, minerals for the collector, microminerals, personalities in the field, media reviews, and coming events. Detailed lists of collecting opportunities in specific localities appear periodically, as do theme issues. Spectacular color photographs appear throughout each issue.

VALÈRE BERLAGE

Focusing primarily on Congolese minerals from Katanga,

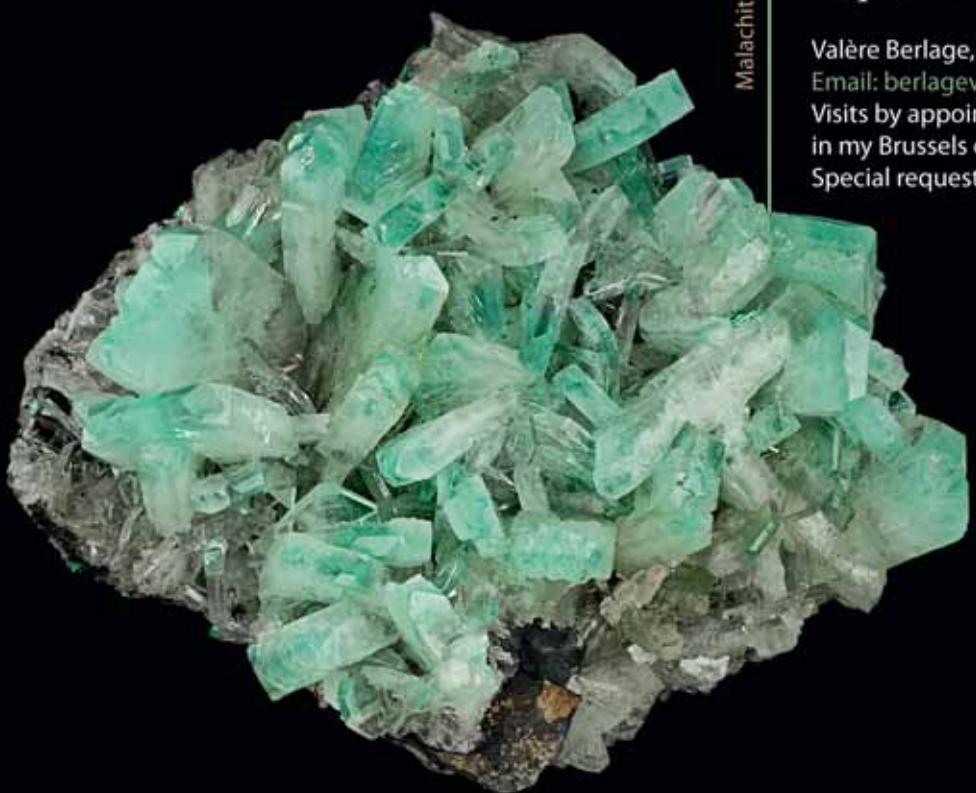

copper specimens, high quality modern finds, rarities and pseudomorphs, with a large inventory of old rarities, combining aesthetics, scientific interest and one-of-a-kind specimens. An exciting project is underway to save more beautiful minerals and to develop scientific research.

Malachite included in barytine, Shangulowe, Katanga, DR Congo, about 12 cm. Photo: Jeff Scovil

The recent acquisition of an old collection and some current opportunities combined with my frequent trips on the field in Katanga, gave me the best inventory I have ever had, with now the one-time ability to provide a great collection of Congolese minerals to any museum, university or collector wanting to acquire one!

Valère Berlage, 0032(0)477274693
